TRANSPORT EFFICIENTLY WITH

NET.FLEET

powered by NETERRA

WHAT IS NET FLEET?

- NetFleet is a GPS system for managing your business.

- With Netfleet you track your vehicles - cars, vans, trucks, agricultural machinery.

- It records the toll fees and successfully transmits all data. No need to install additional devices.

- You monitor in real-time over 50 indicators (fuel level and consumption, travel routes, temperature and engine speed, acceleration, service reports, etc.)

With Netfleet you take control of your entire auto fleet.

WHY CHOOSE US?

• **Receive free TOLL reporting** using the installed GPS devices by NetFleet.
(they are integrated into https://www.tollbg.eu)

• **Avoid possible fines!**
Reporting is regular and automatic, according to criteria set by you.

• There is **unlimited transmission** of data in roaming in the EU and other countries. We store and archive the data for at least 24 months.

• **We guarantee data security** and the continuity of the service - our servers are in own data centers, meeting the requirements of TIER III Uptime Institute (sdc.bg)

• You rely on 24/7 high level technical support

WE WILL HELP YOU TO DEAL WITH:
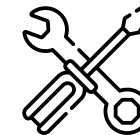

TOLLS reporting

Fine avoidance

Control the performed deliveries and activities

High fuel consumption

High operating costs

Facilitated service

FUEL CONSUMPTION MONITORING:

- The diagram shows the fuel levels when the vehicle engine is started.

- A drastic fuel level drop while working engine and not moving vehicle (in red) is a signal of potential theft.

- We manage to save up to 50% on fuel costs, and to detect up to 95% of thefts from any vehicle.

END OF HIGH OPERATING COSTS

Speed control is key!

Real time information about who, when, where and at what speed goes on pre-set routes.

Speed control + exact trajectory = **high-cost reduction**

Alarm notifications = **increased driver discipline + minimization of fines**

DELIVERIES AND ACTIVITIES CONTROL

- Drivers' personalization and recording of working hours.

- Generate all available data reports from the vehicle computer.

- In/out working hours report.

- Visits and stay of a predetermined site/area report.

- Possibility for video recording (loading and unloading of shipments).

FACILITATED SERVICE

- The system allows you to create a vehicle file of all repairs, informing you in advance about upcoming servicing needs.

- You have access to a large number of parameters related to the operation of each vehicle. This allows you to monitor freights and prevent overheating and overload.

OUR SOLUTION

- Netfleet is a complete solution that includes a GPS tracking software platform, combined with sensors allowing a large number of parameters to be read from the on-board computer of each vehicle.

- Devices transmit data to the software platform and visualized on a desktop or mobile device.

We offer you two types of solutions

OUR SOLUTION

Basic functionality – you can track speed, routes, operating time, driver, and reporting tolls.

Advanced functionality - you can track the parameters of the basic functionality, as well as a huge number of parameters depending on the brand and model of the vehicle. It is possible to install various sensors for heat, humidity, cameras and more.

YOU ALSO GET:

Contact person and assistance with the platform.

Personal profile and different levels of access.

EU certified equipment approved by all agricultural machinery manufacturers.

Device installations

Additional modules and functionalities in the GPS platform, if needed.

24-hour professional technical support.

Free NetFleet platform upgrades.

Guaranteed security for data transfer and storing in Neterra's data centers

WHO ARE WE?

NetFleet is a brand of Neterra - a global telecommunications operator that has been providing comprehensive services worldwide for 25 years.

Neterra has a wide network for data transmission both in Bulgaria and globally through partner networks.

Neterra is well known for its services quality. The company's data network is in the top 100 of global Internet networks and traditionally number 1 in Southeast Europe.

You can find more information about Neterra at:
